

What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

Which region has the largest solar PV panels market in 2024?

The North America has firmly established itself as the dominant region in the global solar PV panels market with 32.2% share in 2024. With its large solar installations and supportive policies, the U.S. market has seen tremendous growth over the past decade.

What is the market share of solar PV panels in 2023?

Based on application, the industrial segment accounted for a dominant share of over 40.0% in solar PV panels sector in 2023. Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy.

Are solar PV panels profitable?

Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy. Installation economies of scale in these sectors compensate for any loss in panel efficiency, making solar PV systems profitable for large-scale generation.
