

What is a solar roof lease?

The lease typically includes maintenance and monitoring of the system by the solar company. One example of a Solar Roof Lease is where the homeowner pays a fixed monthly amount over a set period, usually around 20 years, for the use of the solar panels. This can help homeowners save on their electricity bills while reducing their carbon footprint.

Should you lease or buy a solar roof?

Lower Upfront Costs: One of the key financial advantages of leasing a solar roof is the ability to access solar energy without the need for a large upfront investment. If homeowners choose to lease instead of buy, they can avoid the high costs of installing and buying a solar panel system.

What are the benefits of leasing a solar roof system?

Tax Benefits and Incentives: In some regions, leasing a solar roof system may make homeowners eligible for tax incentives, rebates, or other financial benefits. These incentives can help offset the overall cost of going solar and enhance the financial attractiveness of leasing a solar panel system.

Does a solar roof lease include maintenance & monitoring?

Maintenance and Monitoring Included: Many solar roof lease agreements include maintenance and monitoring services provided by the solar company. This means that homeowners can benefit from professional upkeep of the solar panel system without incurring additional costs.
