

Solar technology international charge controller

A current-limited charging mode is available. The controller automatically reduces the charging power so that the solar panel can operate at the rated charging current. Support automatic identification of lead ...

Mark and Drill Holes - Use a pencil or pen to mark the four (4) mounting hole locations on the mounting surface and drill pilot holes. Secure Controller - Place the controller on the surface and align the ...

The second generation of the PV Logic MPPT Pro charge controller has been designed to deliver the highest possible power from any 12V or 24V solar panel into a 12V or 24V battery.

This controller is for off-grid solar systems and has the additional functionality that it can charge two batteries simultaneously and can work on both 12v or 24v systems.

WARRANTY This Solar Charge Controller is supplied with a 24-month warranty. Should a failure occur during this time Solar Technology International Ltd will repair or replace any faulty part, at its discretion.

Solar charge controller User Manual Functional characteristics: 12v/24v Auto working voltage, you also can choose the voltage of 36v/48v/60v/96v as well as lithium battery. Working current ...

A dual battery solar charge controller, designed for use with all 12V solar panels up to 300W when connected to 12V or 24V batteries. Intelligent management system ensures single or twin battery ...
