

We're continually working to provide reliable, affordable and sustainable power today and for Arizona's future. Check out the stories below to learn how we're innovating today to ensure Arizona continues ...

We've been awarded as Grade A enterprise for China's foreign contracted projects for many consecutive years, and are among the top in the ranking of contracted amount of overseas power ...

Decker Creek Power Station Fayette Power Project Mueller Energy Center Sand Hill Energy Center South Texas Project Renewable Energy Constructed: 2001-2010 Location: Del Valle, TX Fuel: Natural gas, combined cycle, gas turbines Capacity: 595 MW See more on austinenergy South Texas Electric Cooperative Generation Resources - South Texas Electric Cooperative The 24, 8.4 MW generating units provide fast ramping capabilities to STEC's portfolio by virtue of 7-minute start to full load times. The plant consumes very little water due to closed-loop cooling.

Southern Power builds the future of energy by investing in clean energy solutions for the customers we serve. Southern Power currently owns or operates more than 3,050 megawatts of solar generating ...

The 16-outlet power station provides uninterrupted power to most household appliances and essential devices during load-shedding, including refrigerators, air conditioners and electric ovens.

It is expected to generate 400,000 megawatt-hours annually, which is enough to power more than 38,000 Kansas homes. Alluvial Power, the project's developer will own and operate the solar facility, ...

We are also looking to make solar power more accessible and affordable for our customers. Through our Sustainable Tomorrow Energy Plan (STEP), we have multiple solar ...

Small-scale photovoltaic installations generated an additional 4,337 GWh to the Texas electrical grid in 2023. [1] Texas produces and consumes far more electrical energy than any other U.S. state. It ...

We are also part owners of two power plants outside Austin -- one is powered by coal, the other by nuclear fuel. Purchase Power Agreements are in place for the remainder of our generation portfolio, ...

The 24, 8.4 MW generating units provide fast ramping capabilities to STEC's portfolio by virtue of 7-minute start to full load times. The plant consumes very little water due to closed-loop cooling.

South Station Solar Power Generation With the South African power pool's declining generation reserve margin and a move to inverter-based generation, the importance of various ancillary services is ever ...
