

Delta Capacity is a Swiss-based developer of utility-scale battery storage systems and has quickly become one of Europe's fastest growing companies in the BESS sector.

Energy Vault [®]; develops, deploys and operates utility-scale energy storage solutions designed to transform the world's approach to sustainable energy storage.

This project focuses on market design instruments to support the uptake of utility-scale electricity storage in Switzerland to support the integration of solar and wind energy while maintaining system ...

So there you have it - Switzerland's energy storage landscape in 2025 isn't just about electrons in boxes. It's a wild ride of innovation where precision engineering meets environmental ...

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

The project combines utility-scale storage with an AI data center and district heating network in an ambitious multi-use development. The Swiss developer started work this month on the ...

One thing is certain, battery energy storage systems - from residential to commercial & industrial (C&I) to utility-scale - are the absolute short cut to delivering the flexible, electrified energy ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

This large-scale energy storage project plays a key role in stabilizing Switzerland's renewable energy supply. It smooths out the fluctuations of solar and wind power caused by ...

Switzerland has been relying on pumped storage to release power on the grid when needed for decades, and laws have been tailored to support this technology. The trend is not ...
