

The earliest solar photovoltaic power plant

The system ran on a hybrid supply of solar thermal and solar PV power. It was also the first instance of building integrated photovoltaics (BIPV) - ...

In 1876, William Grylls Adams and his student Richard Day discovered that when Selenium (Se) was exposed to light, it produced electricity. While it wasn't perfect, it was the first step towards the ...

This breakthrough paved the way for the solar technology we see today, from solar panels on rooftops to solar farms powering entire communities. The creation of the first practical solar cell is ...

On August 20, 1897, Shuman invented a solar engine that worked by reflecting solar energy onto one-foot square boxes filled with ether, which has a lower boiling point than water, and containing black ...

The system ran on a hybrid supply of solar thermal and solar PV power. It was also the first instance of building integrated photovoltaics (BIPV) - the array didn't use solar panels but ...

The world's oldest solar power plant is the Solar Energy Generating Systems (SEGS) thermal power facility in California, which has a remarkable capacity of 354 megawatts (MW).

Overview
1960-1979
1800s
1900-1929
1930-1959
1980-1999
2000-2019
2020s
so 1960 - Hoffman Electronics creates a 14% efficient solar cell.
o 1961 - "Solar Energy in the Developing World" conference is held by the United Nations.
o 1962 - The Telstar communications satellite is powered by solar cells.

Solar Challenger, the first plane ever powered by solar energy, took off. A system with peak power of 90.4 kW, with modules produced by Solar Power Corporation, was built in Square Shopping Center ...

1974 - J. Baldwin, at Integrated Living Systems, co-develops the world's first building (in New Mexico) heated and otherwise powered by solar and wind power exclusively.

1978 NASA's Lewis Research Center dedicates a 3.5-kilowatt photovoltaic (PV) system it installed on the Papago Indian Reservation located in southern Arizona--the world's first village PV system.

Boeing and Kodak fabricated the first thin-film photovoltaic cells with efficiencies greater than 10%. The 6-megawatt Carissa Plains plant was added to Southern California Edison's system. The project was ...

Shuman built the world's first solar thermal power station in Maadi, Egypt (1912-1913). Shuman's plant used semicircle shaped troughs to power a 60-70 horsepower engine that pumped ...
