

The latest conversion rate of LONGi photovoltaic panels

While in June 2024, the company broke its own record with 34.6% conversion efficiency. Now, within a year, LONGi has achieved a new world record of 34.85% efficiency.

In November 2022, LONGi set a world record for the conversion efficiency of crystalline silicon cells at 26.81%. And then, LONGi increased this record to 27.3% in May 2024, and ...

The breakthroughs include a 33 percent conversion efficiency for a commercial-size silicon-perovskite tandem solar cell and 26 percent efficiency for a crystalline silicon module.

Certified by the authoritative US National Renewable Energy Laboratory (NREL), LONGi self-developed large-area (260.9 cm²;) crystalline silicon-perovskite two-terminal tandem solar cell ...

Exhibit A is the Chinese solar manufacturer LONGi Green Energy Technology, which has just unveiled a new 670-watt module with a conversion efficiency of 24.8% at a showcase in Anhui, ...

According to the European Solar Test Installation (ESTI), LONGi has achieved conversion efficiency of 33.5% for silicon-perovskite tandem solar cells, an increase of 1.7% ...

PVTIME - On 3 November 2023, LONGi, the PV giant, reported a new world record for conversion efficiency of 33.9% on self-developed silicon-perovskite tandem solar cells. This breakthrough has ...

Longi Green Energy Technology Co Ltd, a leading enterprise in the photovoltaic industry in China, broke the world record on Friday with its new conversion efficiency of 33.9 percent for ...

LONGi has once again rewritten the record books in solar cell efficiency, achieving a conversion rate of 34.85% for its silicon-perovskite tandem solar cell, certified by the U.S. National ...
