

# Total investment in photovoltaic solar power generation

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

The International Energy Agency (IEA) projects that investment in solar photovoltaics will exceed \$500 billion in 2024, surpassing the combined investment in all other electricity generation ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs ...

Investments in solar photovoltaic energy have grown during the last years and the technology stands out as the most heavily funded renewable energy source. Find up-to-date ...

Global annual investment in solar PV and other generation technologies, 2021-2024 - Chart and data by the International Energy Agency.

Power sector investment in solar photovoltaic (PV) technology is projected to exceed USD 500 billion in 2024, surpassing all other generation sources combined. Though growth may moderate slightly in ...

Solar PV now commands more investment than all other electricity generation technologies combined. With falling module prices driving fresh investment, the IEA anticipates that ...

Global investment in solar PV hit a record with USD 554 billion in 2024, up by 49%. Investment in energy transition technologies grew globally, but 90% remained concentrated in ...

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...
