

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience.

The paper examines whether Vanuatu's most populated and energy-intensive island could reach the 100 % renewable energy goal cost-effectively and affordably. Different technology ...

To turn ambition into reality, Vanuatu has established a strong policy framework to accelerate the adoption of clean energy. The government has taken decisive steps, such as ...

The RESSET project is designed to increase solar generation and battery storage, with construction standards capable of withstanding climate risks. It is expected to reduce emissions, ...

Discover how Vanuatu is pioneering wind energy integration with advanced storage systems to achieve energy independence and climate resilience.

Through its National Energy Road Map and in line with the goals of its Nationally Determined Contribution (NDC) under the Paris Agreement, Vanuatu aims for 100 percent rural ...

Vanuatu, a tropical paradise with 83 islands, could soon become the hydrogen hub of the Pacific. Why? Because importing diesel for electricity is like using a flip phone in 2025 - outdated ...

With storage costs falling faster than anyone predicted and climate pressures mounting, Vanuatu's energy reservoirs aren't just desirable - they're becoming existential necessities.

Vanuatu is speeding up its move toward a low-carbon future, embedding just transition principles into its national energy and climate plans, with clear emphasis on renewable energy, ...
