

This week, Luca and his team look at IEA's Global Hydrogen Review, new UK-US agreement to accelerate nuclear deployment, and 77 diverse LDES projects advanced by Ofgem.

We've worked on some important energy storage projects in 2024. Discover how these projects are decarbonising the UK's electricity systems.

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

Travelling down this same road, Glen Earrach Energy (GEE) is awaiting approval for its 2GW Fearn pumped storage hydropower project near Loch Ness. If given, it would be one of the ...

London-based developer Statera is set to construct a six-hour battery energy storage system in the south west of England and has secured a grid connection in 2028.

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to ...

However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of these sites that will ultimately become some of the largest ...

Listed below are the five largest energy storage projects by capacity in the UK, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...
