

A containerised generator set represents a comprehensive power solution that combines reliability, mobility, and advanced engineering in a single, self-contained unit.

Containerised power generator sets are complete power generation systems enclosed within durable containers. These containers are designed to protect the generator from external ...

With its clip-on design and Carrier's commitment to quality, this generator supports the efficient operation of refrigerated containers, delivering superior reliability for your supply chain.

Container power generators are available with a rated capacity of 30 kVA to 3000 kVA. Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO ...

SEA BOX's selection of generator sets can be connected to one or several refrigerated containers to provide reliable power with the need to connect to a local power source.

It integrates diesel engine drive, self-priming sewage discharge and mobile deployment functions, and is widely used in scenarios such as municipal flood prevention, farmland irrigation, and emergency rescue.

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient ...

Containerised generators are diesel or gas-powered generators that are enclosed in a weather-resistant, soundproof container. This container not only protects the generator from harsh ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual ...

We offers containerized generator sets with CHP and Emission control system. With our genset containers offer optimal performance in various site conditions.
