

Construction of a new wind power hub has begun in Vinegar Hill. Brooklynites now have reason to believe in the state's and the city's commitment to transitioning away from fossil fuels.

The power industry's trusted source for generation technology, O&M, and legal & regulatory news for coal, gas, nuclear, hydro, wind & solar power plants; power jobs

Horizontal axis wind turbines (HAWT) are the predominant design, featuring blades (usually three) symmetrically mounted to a hub connected via a shaft to a gearbox and generator.

Wind Energy Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning ...

New York's Con Edison on Tuesday said it has broken ground on a transmission substation project, the Brooklyn Clean Energy Hub, to strengthen the region's power grid by serving ...

Con Edison is building the Brooklyn Clean Energy Hub, a transmission substation that will strengthen New York's power grid, help meet the region's growing demand for electricity, and ...

Explore offshore wind policies, projects, and lease areas in the United States using the interactive map below. Click on a state, project icon, or lease area to learn more. The graph to the right displays the ...

Discover the crucial role of hubs in wind energy production and how they impact turbine efficiency and reliability.

Ravenswood Generating Station is the New York City fossil fuel plant that will become an offshore wind hub. It's a 2,480-megawatt (MW) power plant in Long Island City, Queens, across from...

As of 2018 the largest wind farm in the world was the Jiuquan Wind Power Base, an array of more than 7,000 wind turbines in China's Gansu province that produces more than 6,000 ...
