

Wherever you are, we're here to provide you with reliable content and services related to Xuqiao Solar Power Generation. Explore and discover what we have to offer!

It proves that the greenhouse gas offset percentage of the Sihong factory reaches 99% and the renewable energy power percentage is 100%.

As new N-type modules coming out, we see endless opportunities to provide high-efficiency, reliable and aesthetic solar modules, and various application solutions to global customers and markets.

Congratulations to DMEGC Solar, Xu Qiao, Anne-Sophie Zola, Daniela Gerdes, Emma Wan and the entire hardworking team whose commitment has made this achievement possible.

DMEGC Solar has just unveiled two innovative N-type #rectangular wafer module series, M10RT and G12RT. The modules leverage N-type silicon wafers, enabling mass production efficiencies of up to...

Stretching over 235 square miles on the Tibetan Plateau, this solar farm holds the title of the world's largest photovoltaic installation. Upon completion, it will feature over seven million solar ...

With a total of 893 highly efficient DMEGC Solar full-black modules to be installed, the PV system will cover around 25% of the business school's electricity needs.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

The new power plant is the only latest development in the region. It further cements China's growing strength in its solar power generation capabilities.
