

Yerevan, Armenia's bustling capital, is embracing solar energy to combat rising electricity costs and environmental challenges. But here's the catch: sunlight isn't available 24/7. That's where solar ...

Solar energy is the energy received from the Sun, which is converted into electrical energy (Photovoltaics). Solar energy is the cleanest, most abundant source of renewable energy and ...

Yerevan, Armenia, inaugurates its first 150 kW floating solar PV plant on Yerevan Lake, backed by French government support. This step aligns with Yerevan's green energy objectives. ...

That's exactly what the Yerevan project achieves, combining 80MW photovoltaic panels with a 120MWh lithium-ion battery system. As Armenia targets 30% renewable energy by 2030, this facility serves as ...

The mission of "GSS" is the development of the renewable energy sector, particularly of the solar and wind energy systems in Armenia and the region.

Taking into account the policy of reforms being implemented in the sphere of renewable energy and energy saving in Armenia, in 2018, Yerevan Municipality started implementation of an interesting ...

The results of the implemented programmes generally indicate that energy saving, as one of the main goals of Green City programme, is being implemented in Yerevan.

The objective of this project is to reduce the energy consumption and associated emissions of greenhouse gases (about 844 tons of CO2 annually) through supporting application of renewable ...

The Yerevan municipality, with the European Union's support, will launch a program this year to deploy solar energy systems on roofs of 90 houses, the press office of the municipality reports.
